

Greater Tompkins County Municipal Health Insurance Consortium
Medical Auditing Services RFP Questions
February 11, 2014

Question/Clarification	Response				
We still have not received any word on how many claims were processed in the period designated by the Consortium as the timeframe when our sample should be drawn from.	Listed below are the estimated number of medical claims processed for the Consortium for the years listed.				
	Admits or Visits as values		2011	2012	2013
	Medical	Non-Participating Provider	2,390	2,780	6,046
		Participating Provider	59,770	64,487	76,960
		Participation Not Applicable	4,391	4,821	572
		Provider Statuses	66,551	72,088	83,578
The number of Prescription Drug claims should be estimated at 3.0 claims per contract or 1.2 per covered life which would be approximately 80,800 per year.					
In looking through the RFPs, I find that Item #9 lists the required forms. I do not find the following items included in the RFP package: 1. Tompkins County Bid Form 2. Prevailing Wage Receipt Form 3. Iran Divestment Act Compliance Form	These three forms were listed in error in Item # 9, as they were not included on the Bid/Proposal sign off sheet. Please disregard the need to provided them.				
How does the Consortium get the information on the services provided to Excellus?	We would need clarification on this question in order to respond. We do not know what is meant by this question as we are not sure what services are provided to Excellus that the Consortium would need information on.
